End Application:

Quad basic rate isdn (bri) module

Product Name:

Integrated service digital network modem

Special Features:

Quad basic rate isdn (bri) module contains four isdn s/t interfaces and combines with other atlas 550 components to implement an isdn access switch; the quad bri module can emulate the isdn network to other isdn access devices (nt mode) that support the s/t-interface such as routers, video codecs, terminal adapters, and network termination units; downstream speed 160 kbps

Functional Description:

Implement an isdn access switch

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
