Major Components:

Vx403c carrier 1, ip409e modules 2

End Application:

Direction finder sets an/srd-503 and an/srd-504

Product Name:

Digital i/o assembly

Special Features:

Output channels support readback monitoring; socketed termination resistors; parallel i/o for up to 24 bits

Functional Description:

Provides 24 different i/o channels, channel is programmable as an input or an output on a bit in any combination

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
