End Application:

Lvdt rvd simulation board; testing equipment

Product Name:

Vxi instrument card

Special Features:

Replacement for p/n 5410c-83; vxibus data rate of 2 megabytes per second; wideband 360hz to 20khz; standard ratiometric; one 5va excitation supply; continuous background bit testing; message based c size vxi card for mate ciil; occupies a single slot; for testing environments

Functional Description:

Vxi instrument card; 8 stimulus channels of 3-wire lvdt/rvdt

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511k0
