End Application:

Circuit card assembly

Product Name:

Dynamically controlled high speed digital vop

Special Features:

Provides real time digital stimulus and capture with 32 pins per card; up to 16 cards can be daisy chained for a total of 512 pins; 32 pins can be configured as input or output groups of eight; 16 bit extranal bus for triggering and synchnronization with externalevents

Functional Description:

This is a high speed dynamic digital i/o card the provides a full feature set comparable to high speed i/o products found in large functional test systems

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
