Product Name:

Signal/power distribution circuit card assembly

Special Features:

Item includes power conditioning; power sequencing; t/r module temperature monitor; t/r module interface; external interface (inputs); message decoding and processing; board id processing; power sharing and distribution; board status processing; t/r module status processing; external interface (outputs); t/r module enable; heater and blower control

Functional Description:

Circuit card assembly

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
