Product Name:

Bus interface board

Special Features:

24 inputs, 8 outputs; selectable input voltage; programmable clock debounce rate; programmable change of state detection; programmable interrupts on any or all change of state bit(s); pre-loadable even counter; programmable interrupt on event counter overflow; built-in self test; programmable little endian/big endian swapping; pci cycles asynchronous to local bus cycles; programmable board base address; pmc form factor

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A500n0
