End Application:

Ethercat system

Product Name:

4-channel analog input terminal 0...10 volts, single ended, 12 bits

Special Features:

4-single ended inputs; power supply via the e-bus; 1 khz input filter limit frequency; conversion time typical 0.625 ms; current consumption

e-bus typical 130 ma

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A511k0
