Special Features:

End item: enhanced position reporting and data radio system, provides four 10mhz frequency outputs, signal type: analog sine wave, synchronization: frequency locked to the clock 10mhz, accuracy: function of input synchronization source (gps, ipps, irig, have quick), amplitude: +13dbm(+ or -1.5dbm) output impedance: 50 ohm, connectors: bnc female, option slots: 2

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:
