**Overall Length:**

6.0 inches

**Overall Height:**

0.5 inches

**Overall Width:**

3.0 inches

**End Application:**

An/fsd-3

**Features Provided:**

Electrostatic sensitive

**Product Name:**

Circuit card assembly

**Special Features:**

Buffer memory: 2x1mbyte or 2x4mbyte; type fpdp ii; trigger: internal/external edge triggered or level; max throughput: 400mbytes; pci bus interface: pci2.2compliant 64-bit, 66mhz; cooling: approximately 490 lfm; power: +3.3v, +5v

**Functional Description:**

Outputs data to the cip

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A511k0
