Product Name:

Vme time and frequency processor

Special Features:

Vme irig board with standard crystal oscillator; cps or time code inputs; 1pps pulse rate output/interrupt; 1, 5, and 10 frequency outputs; external event capture/interrupt; programmable periodic output/interrupt; programmable time strobe output/interrupt; battery backed clock

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A511k0
