Overall Length:

202.500 inches

Core Construction:

Cellular

Cross-sectional Thickness:

Between 0.531 inches and 0.593 inches

Cross-sectional Width:

Between 0.531 inches and 0.593 inches

Wire Diameter:

0.00450 inches

Core Material:

Silicone rubber

Usage Design:

Electronic shielding on radio freq equipment

Cross-sectional Shape:

Square

Wire Material:

Steel

Wire Surface Treatment:

Copper clad and tin coated

Weather Sealing Compound Impregnation:

Not provided

Nonmetallic Core:

Provided

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T174-f
