Body Style:

Round w/square base

Overall Depth:

1.500 inches

Overall Length:

8.000 inches

Frequency Rating:

32.000 megahertz

Operating Temperature Range:

-0.0/+70.0 degrees celsius

Input Impedance Rating:

50.000 ohms

Output Impedance Rating:

50.000 ohms

Mounting Provision Arrangement Style:

Four position circular

Attenuation In Decibels:

33.000

Signal Delay Method:

Surface acoustical wave

Delay Time Variation Method:

Variable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32100
