Body Style:

Cylindrical, bracketed

Body Length:

Between 3.590 inches and 3.690 inches

Operating Temperature Range:

-20.0/+50.0 degrees celsius

Input Impedance Rating:

1.200 kilohms

Mounting Facility:

Terminal

Signal Delay Method:

Transmission line

Section Delay Time:

0.590 microseconds single section

Pulse Rise Time Rating:

0.38 microseconds

Terminal Type And Quantity:

4 wire loop

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A32100
