General Description:

Flag operated by rotary solenoid; 28vdc normal; pull-in voltage 18vdc maximum 10vdc min; drop-out voltage 2vdc min 16vdc max; coil resistance 850 ohms min 950 Ohms max; power rating 0.9 watts; insulation resistance 100 megohms; operating life 100000 cycles min; rotation 23 degrees min 27 degrees maximum clockwise viewed from shaft end; end play 0.002 in 0.006 in max; leads 12 in min no. 32 awg polytetrafluoroethylene insulated one red one black; housing black anodized per mil-a-8625 type 2

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
