Overall Length:

12.000 inches

Overall Width:

6.000 inches

Thickness:

0.125 inches

Special Features:

The material in this specification is intended for spraying or dip coating of aluminum parts to provide an electrically conductive coating

Material:

Plastic fluorosilicone and silver

Precious Material And Location:

Particles impregnated silver

Shape:

Triangular

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A506y0
