Environmental Protection Material Location:

Throughout rf shielding gasket

Special Features:

Wire to be covered with aluminum conductive tape; front face of window to be coated with antiabrasive coating

Material:

Nickel alloy emi/rfi conductor

Material Specification:

Qq-n-281, class a, form 7 federal specification single material response emi/rfi conductor

Precious Material And Location:

Emi/rfi conductive particles silver

Precious Material:

Silver

Surface Treatment:

Silver emi/rfi conductor

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0

Mil-std (military Standard):

Mil-p-5425 spec.
