Overall Length:

6.281 inches

Overall Height:

2.250 inches

Overall Width:

2.125 inches

Operating Temperature Range:

-22.0/+140.0 degrees fahrenheit

Voltage In Volts And Current Type:

132.0 dc

Special Features:

Case material: nonferrous alloy; battery qty: 1; battery type: wet; inclosure type: hermetically sealed; current rating in amps; terminal location: botton; power source: external; terminal type and qty: tab w/screw, 16; indication: transmitting w/cathode ray tube; sensing element type and location: hair, internal

Specification Data:

80020-623702 manufacturers specification control

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A514a0
