Sealing Element Material:

Rubber, neoprene

Cross-sectional Thickness:

0.250 inches

Cross-sectional Width:

0.500 inches

Cross-sectional Shape:

Rectangular

Wire Material:

Steel, copper clad

Wire Surface Treatment:

Tin plated

Weather Sealing Compound Impregnation:

Provided

Nonmetallic Core:

Not provided

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T174-f
