End Application:

Guidance and control group

Special Features:

Material-beryllium oxide, outside diameter 0.437 in, inside diameter 0.190 in min to 0.210 in max, thickness 0.032 in, melting point 4650 degrees f, tranverse strength 25, 000 psi

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A03600
