Cross Sectional Shape:

Metal with soft filler

Cross-sectional Thickness:

Between 0.016 inches and 0.024 inches

End Application:

Automated surface observing system (asos)

Special Features:

length 2.300 inches; width 0.880 inches; contains two aperture openings 0.530 inches diameter; material is aluminum mesh impregnated with silicone rubber

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
