Electronic Shielding Gasket - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5999-01-413-0921

Hole Diameter: 0.156 inches Overall Length: 12.500 inches Overall Width: 0.630 inches Cross Section Outside Diameter: 0.250 inches Bolt Hole Quantity: 4 Features Provided: Nonseparable Environmental Protection Material Location: Rf shielding gasket outer edge End Cut Angle: 45.0 degrees Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
Overall Length: 12.500 inches Overall Width: 0.630 inches Cross Section Outside Diameter: 0.250 inches Bolt Hole Quantity: 4 Features Provided: Nonseparable Environmental Protection Material Location: Rf shielding gasket outer edge End Cut Angle: 45.0 degrees Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
Overall Length: 12.500 inches Overall Width: 0.630 inches Cross Section Outside Diameter: 0.250 inches Bolt Hole Quantity: 4 Features Provided: Nonseparable Environmental Protection Material Location: Rf shielding gasket outer edge End Cut Angle: 45.0 degrees Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
Overall Width: 0.630 inches Cross Section Outside Diameter: 0.250 inches Bolt Hole Quantity: 4 Features Provided: Nonseparable Environmental Protection Material Location: Rf shielding gasket outer edge End Cut Angle: 45.0 degrees Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
Overall Width: 0.630 inches Cross Section Outside Diameter: 0.250 inches Bolt Hole Quantity: 4 Features Provided: Nonseparable Environmental Protection Material Location: Rf shielding gasket outer edge End Cut Angle: 45.0 degrees Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
O.630 inches Cross Section Outside Diameter: O.250 inches Bolt Hole Quantity: 4 Features Provided: Nonseparable Environmental Protection Material Location: Rf shielding gasket outer edge End Cut Angle: 45.0 degrees Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
Cross Section Outside Diameter: 0.250 inches Bolt Hole Quantity: 4 Features Provided: Nonseparable Environmental Protection Material Location: Rf shielding gasket outer edge End Cut Angle: 45.0 degrees Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
O.250 inches Bolt Hole Quantity: 4 Features Provided: Nonseparable Environmental Protection Material Location: Rf shielding gasket outer edge End Cut Angle: 45.0 degrees Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
Bolt Hole Quantity: 4 Features Provided: Nonseparable Environmental Protection Material Location: Rf shielding gasket outer edge End Cut Angle: 45.0 degrees Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
Features Provided: Nonseparable Environmental Protection Material Location: Rf shielding gasket outer edge End Cut Angle: 45.0 degrees Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
Features Provided: Nonseparable Environmental Protection Material Location: Rf shielding gasket outer edge End Cut Angle: 45.0 degrees Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
Nonseparable Environmental Protection Material Location: Rf shielding gasket outer edge End Cut Angle: 45.0 degrees Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
Environmental Protection Material Location: Rf shielding gasket outer edge End Cut Angle: 45.0 degrees Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
Rf shielding gasket outer edge End Cut Angle: 45.0 degrees Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
End Cut Angle: 45.0 degrees Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
45.0 degrees Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
Material: Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
Silver emi/rfi conductor Precious Material And Location: One surface silver Precious Material: Silver
Precious Material And Location: One surface silver Precious Material: Silver
One surface silver Precious Material: Silver
Precious Material: Silver
Silver
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
