Storage Temperature Range:

+21.0/+27.0 degrees celsius

Width:

0.750 inches

Length:

18.0 yards

Storage Facility:

Preferred controlled humidity warehouse general purpose

Min. Tensile Strength (psi):

22 pounds per square inch

Nominal thickness:

0.0026 inches

Special Features:

Dead soft copper foil backing with electronically conductive, acrylic pressure sensitive adhesive; easy to remove liner; shelf life of 48 months ; if manufacture's shelf life exceed, shall not be used until recertified; tested in accordance with mil-std-202, mil-std-810, and astm d1000; electrical resistance 0.005 ohms psi max; fungus resistant; class f, 155 degrees c continuous operation; effective emi/rfi shielding; peel strength is 25 ounces per inch of width

Material:

Plastic acrylic coating

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A14300
