**Overall Diameter:**

0.688 inches

**Overall Thickness:**

0.625 inches

**Face Size:**

0.688 inches diameter

**Special Features:**

Material is alcomax iii, which is a grade of alnico 5; enclosed in steel pot; center pole is insulated with non-magnetic spacer; removable keeper plate; has 10-32 tapped hole in back for mounting to fixtures and machines; medium magnetic strength; low resistance to demagnetization; corrosion resistance is high; temperature is 800 degrees; poor machinability

**Material:**

Aluminum-nickel-cobalt alloy

**Material:**

Aluminum alloy

**Shape:**

Cylindrical

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T174-a
