Overall Length:

15.000 inches

Overall Height:

0.720 inches

Overall Width:

4.000 inches

Product Name:

Panel, shelding, radio frequency

Material:

Aluminum

Surface Treatment:

Anodize

Special Test Features:

Pressure drop vs. Air flow; radiofrequency interference shielding; thermal shock; salt spray (corrosion)

General Description:

Frame-aluminum per qq-a-200/9; honeycomb-aluminum foil per mil-c-7438, class 2; gasket-chloropreme rubber sponge per mil-r-6130, type ii, grade a, condition medium. Tin-coated copper clad steel per astm b-520; finish per mil-c-5541, class 1a or class 3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
