Overall Length:

47.400 inches

Overall Width:

0.280 inches

Thickness:

0.060 inches

Special Features:

Material fluorosilicone elastomer with silver plated aluminum particles as a conductive filler; material specification mil-g-83528, type d; resistivity supplied (without pressure sensitive adhesive) shall be 0.012 ohm-cm, maximum the volume resistivity after tensile set shall be 0.015 ohm-cm max

Material:

Rubber

Shape:

Irregular

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A506y0
