Cross Sectional Shape:

Emi

Cross-sectional Height:

0.062 inches

Material:

Aluminum emi/rfi conductor and silicon emi/rfi conductor and silver emi/rfi conductor

Material Specification:

Mil-dtl-83528, type d military specification all material responses emi/rfi conductor

Precious Material And Location:

Emi/rfi conductive particle silver

Surface Treatment:

Silver emi/rfi conductor

Surface Treatment Specification:

Mil-dtl-83528, type d military specification single treatment response emi/rfi conductor

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0

Mil-std (military Standard):

Mil-dtl-83528 spec.
