Cross Sectional Shape:

Metal and nonmetallic materials

Overall Length:

0.875 inches

Overall Width:

0.093 inches

End Application:

Control

Special Features:

When using solid, elastomer, mesh is normally 0.31in, 0.79mm higher because mesh compresses easier than solid elastomer under same pressure

Material:

Silicone emi/rfi conductor

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A032a0
