End Application:

Meltem acoustic segment

Product Name:

Controller module assembly.

Special Features:

Serves as the central communication processor, accepts and implements external control commands via the rs-422 data bus; modules sends and receives messages from the acoustic process and directs all svr operations including receiver module tuning and bit command and control; implements control of receiver through communications and subsystems through a serial bus

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A23900
