Cross Sectional Shape:

Hollow

Cross-sectional Thickness:

0.090 inches

End Application:

Rescue hoist system and cargo hook system

Features Provided:

Molded

Product Name:

Conductive elastomer extruded strip

Special Features:

Surface treatment for graphite item is nickel coated; min inside diameter for s6305 item is 0.020 inches; max inside diameter for s6305 item is 0.050 inches; min thickness is 0.015 inches; high precision cut-to-length extrusions; silicone type item can be emi/rfi gaskets

Material:

Graphite or silicone

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A032a0
