Cross Sectional Shape:

Round

Wavelength In Nanometers:

850

Conductor Quantity:

1

Conductor Form:

Solid single conductor

Product Name:

Fo cable assembly

Terminal Manufacturer Identifying Reference Number:

18863 2nd end single conductor

Terminal Commercial And Government Entity Code:

81349 2nd end single conductor

Special Features:

1 marking information: almds-008a16; fiber optic cable p/n 0001boesfh06224hytb; 2 ea terminal ends, nsn 6060-01-533-0846; length: 236.0 inches , and 237.0 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A077a0
