End Application:

Used on of-500 optifiber optical time domain relectometer

Special Features:

62.5/125 um multimode lauch fiber, 100m sc/st connectors w/upc polish; gray zipper; an optical fiber used to couple/condition light from an optical source into an optical fiber; used w/a source to excite the modes of another fiber optic cable in a certain way; mostly used in test systems to improve measurement precision

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
