Overall Length:

12.000 inches

Overall Height:

1.720 inches

Overall Width:

8.600 inches

End Application:

Control, electric power generation system

Voltage In Volts And Current Type:

167.5 ac

Special Features:

High performance fiber optic route protection switch system that provides automated switching between primary and secondary fibers in case of fiber break and/or optical network equipment failure, designed to support a fiber optic data link against fiber break or unidirectional link failure

Material:

Glass fiber

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23900
