Product Name:

Fiber-optic bypass switch

Special Features:

Automatically bypasses a node in fiber-optic network that has lost power; manually operated with front panel switch, remotely operated by control pin on p2; operating wavelength 750 to 1,400 nm; standard vme double height board 160 mm by 233.5 mm; operating temperature 0 to 55 degrees c; 5 ms typical switch speed

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
