Storage Temperature Range:

-55.0/+85.0 degrees celsius

General Description:

Fiber optic transmitter is an integrated electrical to optical transducer designed for digital data long distance transmission 1000 meters; high speed dc to 10 mbaud; no data encoding required; functional link monitoring; ttl input level; built-in optical connector, single 5 volt supply; printed circuit board mtd; 2.430 in. Lg; 0.650 in. W; 0.345 in. H; two 2-56 nc thd mtg holes spaced 0.400 in. C to c; warning observing the transmitter output flux under magnification may cause injury to the eye; caution lock nut and barrel should not be disturbed

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A23900
