Overall Height:

4.880 inches

Product Name:

Audio transmitter

General Description:

2.200 volt input and output signal; 20 hertz to 20 megahertz bandwidth; 600 ohms input and output impedance; 60 decibels signal/noise; operating temperature minus 20 degc to 70 degc; power supply and audio connectors are female plugs with screw clamps; power is 24 volts ac; 850 nm wavelength; four number 6 screws recommended for mounting hardware, which measures 7.100 inches long, 4.880 inches high, 5.500 inches center to center length between mounting holes and 4.460 inches center to center height between mounting holes; 13000 feet distance

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
