Storage Temperature Range:

-55.0/+100.0 degrees celsius

Current Rating:

105.000 milliamperes or 130.000 milliamperes

Product Name:

Dtl-1300 hermetic data link module

Special Features:

Supply voltage typical negative 5.2 v; power dissipation 550 or 750 mw; center wavelength typical 1320 nm; optical output power typical negative 15.0; rise/fall time typical 4.0 ns; data 100 mb/s; operating temperature negative 40 to positive 85 degrees celsius; small 16-pin hermetic metal packages

Material:

Glass fiber

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
