Overall Length:

8.120 inches

Overall Height:

5.080 inches

Overall Width:

1.390 inches

Special Features:

Part listed as an analog optical fiber link by manufacturer; applications include tvro, broadcast, earth stations, headends, vsat, gps, and wireless; 5 - 2700 mhz frequency range; 40 km optical range; adjustable rf gain; optimal rf level indicator; cooled, isolated 1310 nm dfb; 8 transmitters per chassis; 16 receivers per chassis; receiver options include sma (50 ohm) rf connectors and sc/apc optical connectors; acceptable optical power 10 dbm

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
