Overall Length:

9.120 inches

Overall Height:

5.060 inches

Overall Width:

1.390 inches

Special Features:

Part name assigned by manufacturer is microwave pin photodiode receiver; applications include antenna remoting, cell and pcs networks, military triband comms, tracking-telemetry and control; features include high dynamic range, long-distance comms, 10 mhz to 20 ghz bandwidth, dual 130nm/1550nm window, y2k compliant; -40 to 65 c operating temp; 100 ma total operating current; 1290 - 1580 nm wavelength; fc/apc bulkhead optical connector for flange and plug-in package types

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
