Overall Length:

9.120 inches

Overall Height:

5.060 inches

Overall Width:

1.390 inches

Special Features:

Part listed as analog optical fiber link by manufacturer; applications include tvro, broadcast, earth stations, headends, vsat, gps and wireless; features include 5 to 2700 mhz amplification, 50 ohm impedance; adjustable rf gain; optimal rf level indicator; cooled-isolated 1315 nm dfb; 8 transmitters and 16 receivers per chassis; sma (50 oms) rf connectors; sc/apc optical connector

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
