Overall Length:

4.500 inches

Overall Height:

2.562 inches

Overall Width:

1.453 inches

End Application:

Perimeter acquisition radar attack characterization system

Current Rating:

400.000 microamperes

Product Name:

Module, converter

Special Features:

Multimode; rfi suppression-std unit; wavelength-100 base-s (820nm) ; maximum distance-300m; wavelength-820 nm; output pwr-minus 18dbm; receiver sensitivity-minus 24dbm; loss budget-6db; interface connector-rj-45; op temp-50 degrees c max; data rate-100 mbps; name on tech data-fiber optic isolator; automatic mdi/mdix switch-over capability to allow a straight or crossover cable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
