Product Name:

Pocket-sized dual wavelength light sources

Special Features:

Designed for dual wavelength measurement in various single mode or multimode applications. The ols-6 is designed for dual wavelength measurement in various single mode applications. It has two laser diodes (1310/1550 nm or 1550/1625nm) on two output ports

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
