Overall Height:

2.660 inches

Overall Length:

2.226 inches

Overall Width:

3.000 inches

Shaft Rotation Direction:

Clockwise single end

Duty Cycle:

Continuous

Inclosure Feature:

Totally enclosed

Winding Type:

Permanent magnet

Mounting Method:

Fixed base

Mounting Facility Type And Quantity:

2 unthreaded hole

Cooling Method:

Nonventilated

Current Rating Method:

Load

Inclosure Specificationification:

Commercial

Features Provided:

Vertical mounting position

Length Of Shaft From Housing:

0.250 inches single end

Center To Center Distance Between Mounting Facilities Parallel To Length:

2.630 inches

Rotor Speed Rating In Rpm:

4980.0 single full load

Current Rating In Amps:

0.100 single input

Connection Type And Voltage Rating In Volts:

12.0 line to neutral single input

Shaft End Characteristic:

A23 single style single end

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A271a0
