Overall Length:

53.500 inches

Shaft Rotation Direction:

Clockwise single end

Duty Cycle:

Continuous and intermittent

Winding Type:

Shunt wound

Mounting Method:

Flange

Power Rating:

160.000 horsepower input

Temperature Rating:

50.0 ambient degrees celsius

Rotor Speed Rating In Rpm:

3840.0 single full load

Departure From Cited Document:

Modified by warren pump drawing e4550-a267

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A271a0
