End Application:

Stern boat carriage, p/n d2-402-0020-rh

Special Features:

Modular digital encoder; this magnetoresistive encodur sensor based unit designed for mounting onto a standard nema 8.5 inch motor face; encoder frame is mounted onto the c-face flange of a motor; this positions the sensor & contains the electronics; the magnetic pulse on the motor shaft has magnetic pulses imprinted on the outside surface; as the motor spins the passing magnetic pulse actuate the magnetoresistive sensor; the resulting electronic signals are processed into square wave signals by the internal electronics

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
