Overall Length:

11.375 inches

Overall Height:

6.250 inches

Overall Width:

5.500 inches

Major Components:

Relay operated friction brake 1; drive motor 1; microswitches 2; variable powerstat transformer 1

End Application:

Type an/sps-10

Usage Design:

Supplies variable voltage of 0 to 115 v

Mounting Configuration:

Three 0.281 in. Diameter counterbored holes and one 0.250 in. -20 thd hole on 2.750 1n. By 3.093 in. Mtg centers

Special Features:

Transformer tapped at 70.3 v

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T01200
