Overall Length:

14.000 inches

Overall Height:

16.000 inches

Overall Width:

8.000 inches

Actuation Method:

Magnetic

Performance Type:

Semiautomatic

Fuse Accommodation Quantity:

1

Duty Cycle:

Continuous

Mounting Configuration:

Four holes for 7/16 in. Mtg bolts on 14 in. By 12-1/2 in. Mtg centers

Operating Voltage Characteristic:

Reduced

Voltage Reduction Method:

Resistor

Full Voltage Restoring Method:

Manual acceleration

Horsepower Rating:

5.000

Actuator Voltage:

230.0 dc

Fuse Current Rating In Amps:

10.0

Load Protection Type:

Overload and undervoltage

Ambient Temp:

50.0 degrees celsius

Inclosure Feature:

Dripproof

National Electrical Manufacturers Association Standards Design:

Not designed per nema std

Switch Functional Positions:

Start

Control Type:

Local

Features Provided:

Accessory location external and circuit protection fuse

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A541b0
