Overall Length:

3.240 inches

Mounting Method:

Terminal

Circuit Type:

Series

Regulation Method:

Electronic

Electronic Device Type:

Transistor

Regulation Percent:

5.00

Input Current Type:

Dc

Output Current Type:

Dc

Output Current Rating:

1.0 milliamperes

Power Rating:

1.0 watts

Special Features:

110.0v breakdown voltage, 490 ohms impedance, silicon zener voltage, regulator

Precious Material And Location:

Terminals gold

Precious Material:

Gold

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A540z0
