Speed Adjustments:

0 to full speed

Overall Length:

8.750 inches

Overall Height:

3.000 inches

Overall Width:

5.380 inches

Ac Voltage Rating:

115.0 volts

Frequency Rating:

50.0 hertz and 60.0 hertz

Performance Type:

Manual

Fuse Accommodation Quantity:

1

Duty Cycle:

Continuous

Fuse Current Rating In Amps:

5.0

Ambient Temp:

32.0 degrees fahrenheit and 104.0 degrees fahrenheit

National Electrical Manufacturers Association Standards Design:

Not designed per nema std

Amp Size Rating:

1.3

Control Type:

Local

Features Provided:

Reversible and circuit protection fuse

Phase:

Single

Special Features:

This item is the driver portion of a compumotor model m83-93 motor/drive system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A541b0
