Speed Adjustments:

Two speed

Overall Length:

40.250 inches

Overall Width:

22.000 inches

Ac Voltage Rating:

440.0 volts

Frequency Rating:

60.0 hertz

End Application:

Capstan

Size Designator:

2

Duty Cycle:

Continuous

Operating Voltage Characteristic:

Full

Horsepower Rating:

15.000

Load Protection Type:

Overload and undervoltage

Ambient Temp:

40.0 degrees celsius

Inclosure Feature:

Watertight

National Electrical Manufacturers Association Standards Design:

Designed per nema std

Switch Functional Positions:

Slow and stop and fast and reverse

Features Provided:

Reversible

Phase:

Three

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A541b0
