Overall Length:

6.500 inches

Overall Height:

7.090 inches

Overall Width:

3.940 inches

Ac Voltage Rating:

Between 102.0 volts and 132.0 volts

Frequency Rating:

50.0 hertz and 60.0 hertz

End Application:

B1b, rfs/ecms; an/alq-161

Performance Type:

Automatic

Duty Cycle:

Continuous

Operating Voltage Characteristic:

Full

Ambient Temp:

0.0 degrees celsius and 70.0 degrees celsius

Inclosure Feature:

Partially enclosed

National Electrical Manufacturers Association Standards Design:

Not designed per nema std

Amp Size Rating:

1.5

Control Type:

Local

Phase:

Single

Special Features:

This is a programmable full step/half step dc stepper motor controller/driver device. It is part of the sys. Used to perform alignment on the ts-4210/alq-161a anechoic device p/n 1970344- (6636-01-183-5174); altitude rating: 10, 000 ft(3048 meters) max.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A541b0
